Education

New York University — Courant Institute of Mathematical Sciences

New York, NY

Master of Science in Computer Science — GPA: 3.89/4.0

Sep 2021-Present

National Institute of Technology Warangal

Warangal, India

Bachelor of Technology in Computer Science & Engineering— 8.11/10.0 (First class with distinction)

May 2018

Selected Coursework: Computer Vision (CSCI-GA.2271), Natural Language Processing with Representation Learning (DS-GA 1011) and Fundamental algorithms (CSCI-GA.1170)

Technical Skills

Languages: C++, Python, Objective-C, SQL

Frameworks & libraries: PyTorch, TensorFlow, NumPy, Pandas, Matplotlib

Experience

New York University — Center for Data Science

New York, NY

Research Assistant, Advisor: Prof Krzysztof J. Geras

Jan 2022 - Present

- Studying deep learning models for medical NLP and vision problems.

Microsoft India R&D Private Limited

Hyderabad, India

Software Engineer 2 (Technical lead)

June 2018 – August 2021

- Lead a team of three engineers to ship the PDF experiences of Office iOS application.
- Developed and integrated key features from day zero such as PDF viewing, editing, cloud file support and merge/extract PDFs.
- Owned the Intune area (mobile application management) for Office iOS application. Helped on-board several features into compliance. Worked with enterprise customers on several high impact data leaks and fixed them.
- Designed and implemented the caching system for supporting cloud images.

National Institute of Technology Warangal

Warangal, India

Undergraduate research

Mar 2018 – Dec 2018

- Proposed a ResNet based segmentation-free classification method for whole slide images of cervical cell clusters with an accuracy of 96.37% on SIPakMeD dataset.
- Explored the features (such as the size of perinuclear cavity, cytoplasm and nucleus) learnt by the network by applying PCA on the penultimate layer of the network and explored visual saliency using Grad-CAM.
- Analyzed the performance of the network on unbalanced datasets through metrics like F-score, Sensitivity, Specificity and H-mean in comparison to previous baselines (AlexNet, VGG-16, DeepPap).

Indian Institute of Science — Computational Intelligence Lab

Bangalore, India

Research Assistant, Advisor: Prof S.N Omkar and Dr. Amarjot Singh

May 2017 - July 2017

- Proposed a real-time aerial pose estimation and person identification system using ScatterNet based deep neural network based on Part Affinity Fields.
- Designed protocols and executed the collection of real-world data from the drones and annotation of the data collected from various heights.
- Continued to work for two years at the National Institute of Technology Warangal for data collection, model design, implementation and real-world testing.
- Media coverage: Featured in [Discovery Seeker](#) and [Digital Trends](#).

Peer-reviewed Publications

- Real-Time Aerial Suspicious Analysis (ASANA) System for the Identification and Re-Identification of Suspicious Individuals using the Bayesian ScatterNet Hybrid (BSH) Network. Singh, A., Patil, D., **GV, Kranthi Kiran** and Singh, A. and Harsh, O. and Kumar, R. and Singh R., and Vamsi S **ICCV Workshops 2019** [[Link](#)]
- Automatic Classification of Whole Slide Pap Smear Images Using CNN With PCA Based Feature Interpretation. **GV, Kranthi Kiran**** and Meghana Reddy, G**. **CVPR Workshops 2019** (** indicates equal contribution) [[Link](#)]
